RETRO PRESENT FUTURE – 20 YEARS OF REIZ

The R20 spectacles of REIZ are classics. The original designs from 1996 have been newly interpreted for this collection. They are handmade with a love for detail and opti-visually perfected. The expression „Zeitgeist“ probably fits best: The genetic design code of these frame classics is merged with the here-and-now feeling.

R20 is not “only” retro but there is a sophisticated system behind it which brings acetate and titanium together. The beams are available in the variations pure, graphite and as a special treat coated with 24k gold. The line R20 is based on a modular design. The colours of the acetate frames are freely combinable with the titanium beams.
